## ABB i-bus ${ }^{\circledR}$ KNX

## Switch Actuator, x-fold, 16/20 A, MDRC SA/S x.16.5.1, 2CDG 110 1xx R0011

The 16/20 A Switching actuators SA/S x.16.5.1 are modular installation devices in ProM Design for installation in the distribution board.
The devices are particularly suitable for switching loads with high peak inrush currents such as fluorescent lighting with compensation capacitors or fluorescent lamp loads (AX) to EN 60669.
Manual actuation of the Switch Actuator is possible using a button. This simultaneously indicates the switching state.

## Note

For a detailed description of the application program see „Switch Actuators SA/S" product manual. It is available free-of-charge at www.ABB.de/KNX.

The ETS and the current version of the device application program are required for programming.

The current version of the application program is available for download on the Internet at www.abb.com/knx. After import it is available in the ETS under ABB/Output/Binary output xf $16 \mathrm{C} / \ldots{ }^{*}(x=2,4,8$ or 12 ).
The device does not support the closing function of a KNX device in the ETS. If you inhibit access to all devices of the project with a BCU code, it has no effect on this device. Data can still be read and programmed.
