

Design your capacitive switch in 10 easy steps

① Register into the web application

Access the on-line application to design TMD: <http://tmd.zennioapps.com>

Click on **Register** and fill in the form.

The on-line application will send you a verification link to the specified email address so that you can validate your account.

Check your Spam inbox if you cannot find the verification email.

Now you can access the on-line application with your **Email** and **Password**.

② Sort out your ideas

Create **Folders** to sort your projects out.

Create a **New project** for your device.

The screenshot shows the Zennio Touch-MyDesign software interface. On the left, a sidebar shows a user named 'Miriam' with a folder structure: 'New Folder', 'Project 1', 'Project 2', and 'Project 3'. The main workspace has a top bar with 'New Folder' and '+ New Project' buttons. A project icon labeled 'First Project' is visible. A context menu is open over the 'First Project' icon, listing options: 'TMD Plus', 'TMD-Display', 'Square TMD-Display', 'Square TMD', 'TMD-Display View', 'Flat X', 'Flat-Display', and 'IWAC-Display'. At the bottom left, a storage indicator shows '23.47 MB / 50 MB'. The footer contains 'Zennio Avance y Tecnología S.L. © 2018'.

Place the pointer over the project to show the available options:

- Rename
- Delete
- Duplicate
- Download image

You can move projects from one to another folder by drag and drop them.

You have **50 MB** available to create your projects

Set a name for your project and click on the project icon to start creating your design.

③ It is time for important decision making

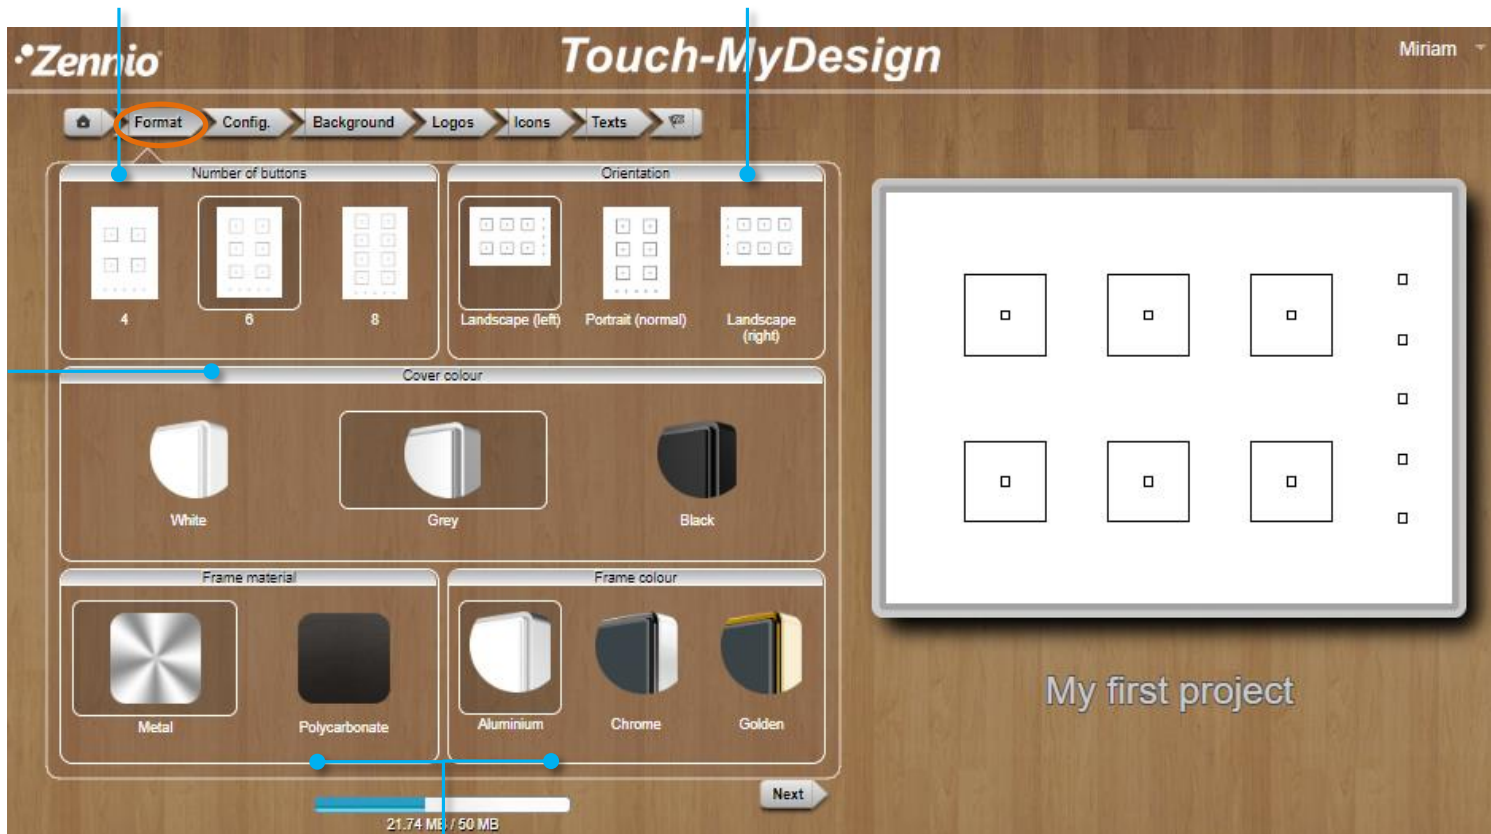

Select the **number of main buttons**

Optional for TMD-Plus, Square TMD and Flat X.

Set the **orientation** of your TMD.

Optional for TMD-Plus, Square TMD and Flat X.

Choose the **Cover colour** that fits the best to your design.

Select the **Frame** you want. The available options may vary depending on the selected product and it can affect the final product cost.

When choosing "Polycarbonate" as material, the colour frame will be the selected one for the cover.

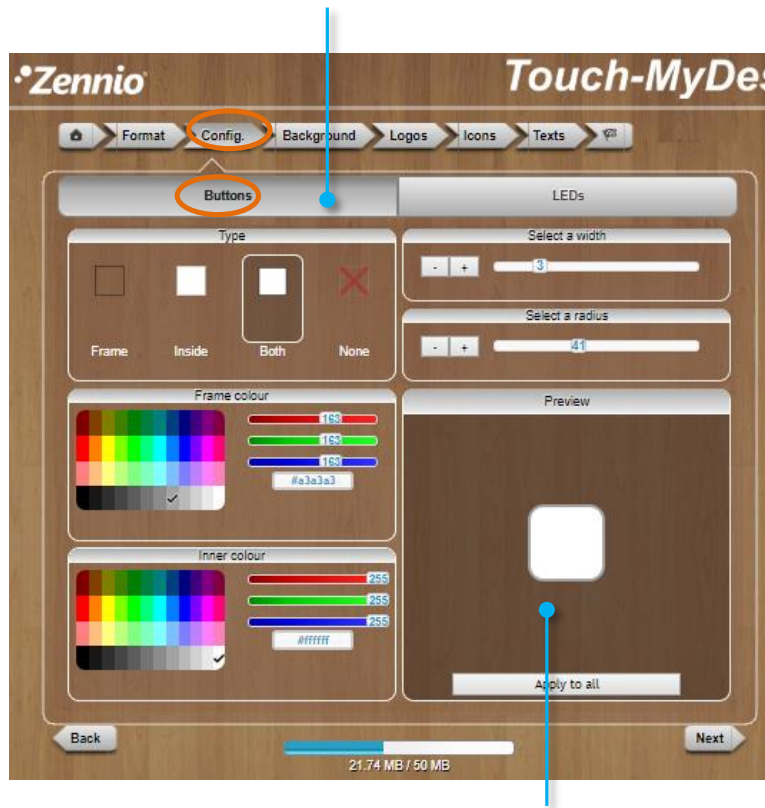

Use the navigation menu at the top of the page or the button  to move to next tab, **Config**.

④ Design the buttons

Configure the appearance of the buttons.

It is possible to define a frame for the button, selecting shape and colour. Even a colour to fill the button.

Create rounded borders selecting a 100-size radius.

In this area, you could preview the changes before applying them to your design.

In **Flat X** and **Flat Display** projects (with backlit icons) and **IWAC Display**, the buttons will be configured from the **Buttons** tab.

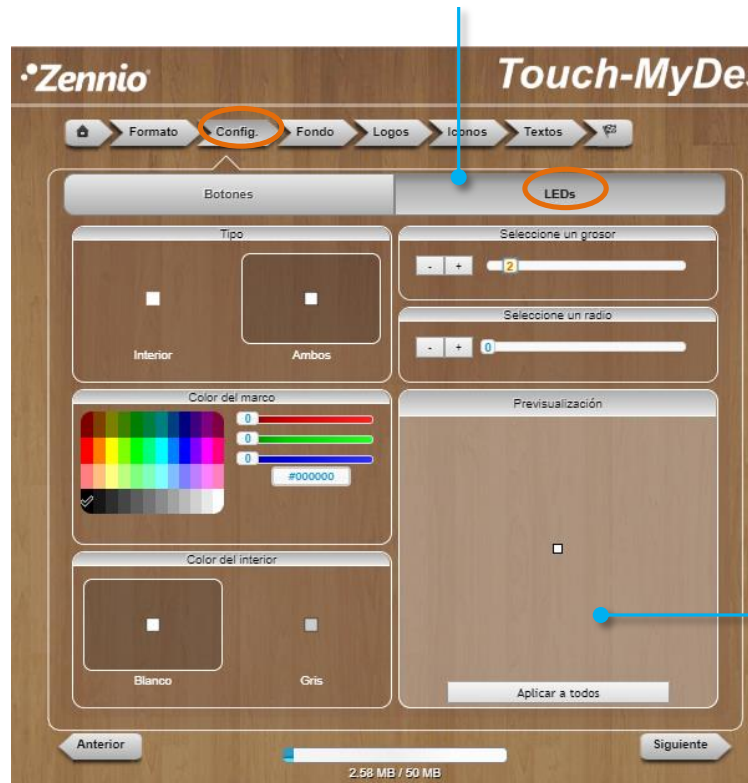

You could apply the selection over all the buttons of the device.

Use the navigation menu at the top of the page or the button  to move to next tab, **Background**.

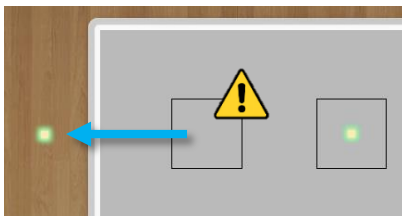

④ TMD Family – Design the LEDs

It is also possible to modify the LED indicators appearance.
In this case, the LED inner colour only can be white or grey.

This option is not applicable to **Flat X** and **Flat Display** projects (since their icons are backlit) and to **IWAC Display**.

In this area, you could preview the changes before applying them to your design.

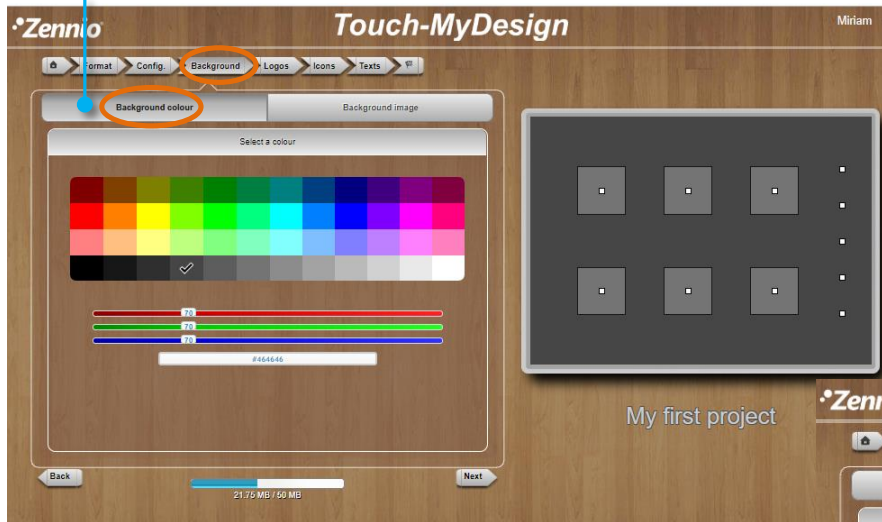

You can remove the buttons design and LED indicators just by draggin and dropping them out of the design area, but take into account that **deleting a LED indicator from the design means to remove it physically from the TMD device**. Not deleted LEDs are highlighted in yellow with a green halo. LEDs can be deleted only in this "Configuration" Tab.

Use the navigation menu at the top of the page or the button  to move to next tab, **Background**.

⑤ Select the background of your design

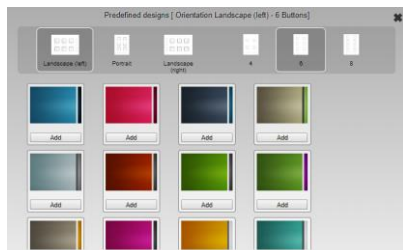

You can select a uniform **Background colour** for your design...

... or choose a customized **Background image**:

- Allowed formats: .jpg/.jpeg - .gif - .png - .bmp
- Minimum size:
 - o Square TMD and Square TMD Display: 1016 x 1016 px.
 - o TMD Plus and TMD Display One: 1016 x 1400 px.
 - o IWAC Display, Flat X and Flat Display: 940 x 940 px.

Click here to access our predefined designs **gallery**

...or add your own **images**.

Adjust the image area to be displayed as the background.

You can create the whole design using a design software and import the result as a background image. Use the PSD **templates** in this process as a reference of dimension and position of the buttons.

Use the navigation menu at the top of the page or the button  to move to next tab, **Logos**.

⑥ Make your design unique

Add your company **logo**, **customized icons** or decorative element to your design.

Click here to add your own images.

Drag and drop the image to your design area and adjust its size. Use the arrows of your keyboard to place the image in a more specific position.

You can remove the elements by dragging and dropping them out of the design area.

Use the navigation menu at the top of the page or the button  to move to next tab, **Icons**.

⑦ TMD Family– Select the icons

For TMD-Plus, TMD-Display, Square TMD and Square TMD-Display projects:

Select the **size**, **colour** and **icon** that suits better the function of each button. Then, drag and drop the icon to the design area.

Icons size

Icons colour

You can select filled icons or icons only with contours.

Icons gallery

If you drag and drop the icon to the button area, it is automatically placed in the middle.

Information of the selected object.

Size: 41, Colour: #8c8c8c, (x:88.5,y:55.2)

Note that you can add your own icons importing them as Logos from the “Logo” tab.

Use the navigation menu at the top of the page or the button  to move to next tab, **Texts**.

⑦ IWAC Display – Select the icons

For **IWAC** projects you can configure the icons analogously as previously explained, from the **Icons** tab.

Moreover, the **NFC Icon** can be defined from the tab named as such.

Note that you can add your own icons importing them as Logos from the “Logo” tab.

Use the navigation menu at the top of the page or the button  to move to next tab, **Texts**.

⑦ Flat Family – Select the icons

For **Flat X and Flat Display** projects the icon will be configured analogously as previously explained, from the **Backlit Icons** tab

Icons size

Icons colour

You can select filled icons or icons only with contours.

Icons gallery

If you drag and drop the icon to the button area, it is automatically placed in the middle.

Information of the selected object.

Note that, in order to get icons properly backlit, it is only possible to choose icons from the icons gallery and in white or grey colour.

Use the navigation menu at the top of the page or the button  to move to next tab, **Texts**.

⑧ Include texts to complete your design

Select the **font type**, **size** and **colour** and complete your design with your own customised texts and labels.

The text will appear here. Drag and drop it to the desired place in the design.

The screenshot displays the Zennio Touch-MyDesign software interface. At the top, there is a navigation menu with buttons for Format, Config., Background, Logos, Icons, and Texts. The 'Texts' button is highlighted with a red circle. Below the menu, there are three sections for font selection: 'Select a font' (with a dropdown menu showing 'Arabic Typesetting'), 'Select a size' (with a slider set to 5), and 'Select a colour' (with a color palette and a color code field showing '#747474'). A large text input area is shown with the placeholder text 'Sample text'. A mouse cursor is positioned over the 'Next' button at the bottom right. To the right of the main interface, a preview window shows a design template with various icons and text elements. The preview window has a title bar with 'EXIT' and a list of icons. The text 'My first project' is visible at the bottom of the preview. The Zennio logo is also present in the preview. At the bottom of the preview, the font settings are displayed: 'Font: Arabic Typesetting, Size: 5, Colour: #747474, (x:55.7,y:1.0)'. The main interface has a 'Back' button at the bottom left and a 'Next' button at the bottom right. A progress bar at the bottom indicates '21.52 MB / 50 MB'. The name 'Miriam' is visible in the top right corner of the main interface.

Click on the arrow or press "Enter" key to add the text to the design area.

Use the navigation menu at the top of the page or the button  to move to next tab, .

⑨ Check the result

Click on **Preview Project**. A PDF document will be generated to show you the final appearance of the device when printed. Review this design to make the desired changes before finishing the project.

Conditions for project printing

From this page it is possible to mark the current state of the project as finished.

- Once a project has been finished, further editing is locked, i.e., modifying or reuploading the project is no longer possible.
- It is not necessary to finish the project right now. On the contrary, you are encouraged to download the PDF preview of your current design first by clicking on **PREVIEW**, after which the project will still be editable at any time. Nevertheless, only finished projects must be referenced at the moment of placing an order for the actual device.

Preview:

- It is advisable to verify that the generated PDF image matches the expected design prior to finishing the project. After clicking on the **PREVIEW** button, it may occur that minor differences can be perceived between the design in the workspace and that in the PDF file, mostly due to differences in the resolution of the various visualization environments (monitors, screens, laptops, windows, operating systems, etc). However, should any problem or notable difference arise while generating the PDF-based image, please feel free to contact our Technical Support department at the following link:

Finish:

- Once having verified the PDF preview, you can proceed to finish your project. This is done by clicking on the **FINISH** button. When this action is performed, a PDF document will be sent to your profile e-mail address (which is to find your username). This attached PDF file contains your design and a reference code that will unequivocally represent it and that may be used for placing an order for your design.
- In order to have the **FINISH** button enabled, please accept these legal conditions by marking the checkbox next to "I accept the above conditions".
- Once the project is finished, it may be used as a basic design for other projects by clicking on the "Duplicate" option, which is shown over the finished project, in the "Workspace".
- Finishing a project will delete all contents not being used (UNUSED background images and logos), so any later duplication of that.

I accept the above conditions.

Zennio® Touch-MyDesign

Product: ZVI-F6	Reference: ZF72175FSNM6 *	Date: 15/11/2018
------------------------	----------------------------------	-------------------------

User: miriam@zennio.com - Miriam
Project: /Project 2/My first project
CAUTION: Only the icons are backlit. The buttons, logos and texts are not backlit.

Buttons, texts and logos (even icons included as logos) WILL NOT BE BACKLIT.

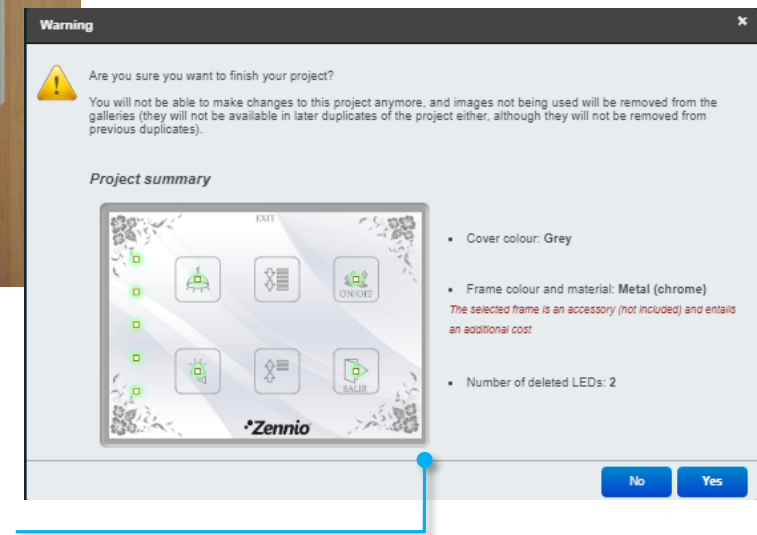

⑨ Check the result

When you are satisfied with your design, **accept the conditions for project printing** to be able to **Finish the project** and continue to generate the PDF file with the design code. After that, a pop-up will emerge as summary of your project.

Once the project has been finished, changes cannot be made in the design, unless you duplicate the project and edit it. Not used Images will be removed.

Note: Remember that the project should not be removed from the Touch-MyDesign tool until the printing process has been completed.

⑩ Make real your design

In the PDF that will be downloaded, you will find the **instructions to place your order**, besides to the most important, **the design code**.

Zennio® Touch-MyDesign

CAUTION: 2 LEDs have been hidden. All these LEDs will not light up.

If getting this message, make sure that no LED indicator has been deleted by mistake. See section 4.

Instructions to place an order

HOW TO ORDER:

1. Once the project has been finished, download and save the generated PDF file.
 2. Contact your usual distributor to request an offer, specifying the reference code provided within the above PDF. Multiple references of finished projects may be included in a sole request, and as many copies as desired.
 3. Once the offer is received, you can send your order to your distributor.
 4. Wait for the delivery in the date indicated in the offer from your distributor.
- For any inquiries in relation to your orders please contact tmd-order@zennio.com.

LEGAL CONDITIONS: http://touchmydesign.zennio.com/docs/cup_en.pdf

VERY IMPORTANT: by marking a project as 'finished', the user expresses their approval of the final appearance of the design as shown in the PDF document. Projects are printed according to their final design. Please **DO NOT** send print orders of this project in case any substantial difference is found between the intended design and the resulting PDF file, and notify us through <https://support.zennio.com>.

⑩ Make real your design

Furthermore, you will receive the instructions to place the order by **email**, along with the PDF file in attachment.

Instructions to place an order:

Touch-MyDesign

Hello Miriam,

The project **My first project** available under **/New Folder** has been finished.

Attached to this message you can find a descriptive view of the project as well as the corresponding reference for placing orders. **Please remember not to delete the project until your order has been delivered.**

After "Finishing" the project, it should not be removed. Otherwise, we will not be able to print it.

HOW TO ORDER:

1. Once the project has been finished, download and save the generated PDF file.
2. Contact your usual distributor to request an offer, specifying the reference code provided within the above PDF. Multiple references of finished projects may be included in a sole request, and as many copies as desired.
