ABB i-bus® KNX

FCC/S 1.1.2.1

Fan Coil Controller, PWM, MDRC

Product description

The device is a modular installation device (MDRC) in pro *M* design. It is intended for installation in distribution boards on 35 mm mounting rails. Physical address assignment and parametrization are carried out with ETS. The device is powered by the ABB i-bus® KNX bus and requires no additional auxiliary voltage supply. The device is ready for operation after connecting the bus voltage.

Note

For a detailed description of the application see product manual. It is available free-of-charge at <http://www.abb.com/knx>

ETS and the current version of the device application are required for programming.

The device does not support the locking function of a KNX device in ETS. If you use a BCU code to inhibit access to all the project devices, it has no effect on this device. Data can still be read and programmed.
