

1.0 Introduction

The Arcus-EDS Water Meter is a calibrated „Modularis“ water meter from the company NZR with an inbuilt impulse module and counter, as well as a battery back-up data storage unit and KNX Bus Interface for remote reading and monitoring.

2.0 KNX Interface

Item Chart:

The following items are available for remote reading with the KNX/EIB System:

Nr.		Data Point Type	Data Type
0	Accumulated Volume in m ³	DPT14.076 = Volume	Measurement 4 Byte
1	Current Flow m ³ /unit of time	DPT14.077 = Volume Flow	Measurement 4 Byte
2	Current Time	DPT10.001 = Time	Time 3 Byte
3	Current Date	DPT11.001 = Date	Date 3 Byte
4	Last Control Date	DPT11.001 = Date	Date 3 Byte
5	Last Control Reading	DPT14.076 = Volume	Measurement 4 Byte
6	Next Control Date	DPT11.001 = Date	Date 3 Byte
7	Consumption	DPT14.076 = Volume	Measurement 4 Byte
8	Consumption Reset	DPT07.000 = Reset	Reset 16 Bit
9	Consumption Date	DPT11.001 = Date	Date 3 Byte
10	Consumption Time	DPT10.001 = Time	Time 3 Byte
11	Serial Number	DPT16.000 = String	Identification 14 Byte

Accumulated Volume	in m ³ , the current meter reading.
Current Flow	Volume flow in m ³ /unit of time, parameters for the unit of time are set up.
Current Time	Internal clock.
Current Date	Internal date.
Last Control Date	The date when the last control reading was saved at 12:00 a.m.
Last control Reading	The meter reading from the last control date at 12:00 a.m.
Next Control Date	The date when the next control reading will be saved at 12:00 a.m.
Consumption	Water consumption since the last consumption reset.
Consumption Date	The date of the last consumption reset.
Consumption Time	The time of the last consumption reset.
Serial Number	The serial number on the meter.

Transmission requirements are set by the ETS parameters.

The following items can be adjusted:

Current Time	The internal clock of the water meter is reset.
Current Date	The internal date of the water meter is reset.
Next Control Date	The next control date is reset.
Consumption Reset	Consumption is set to zero and the current date and time are saved. If the reset PIN does not equal zero then the transmitted reset value must equal the PIN value. If the reset PIN is zero then the reset value must not be zero.

General settings	
Send all values periodical	1 minute
Unit per Pulse	1
Unit per Pulse (*10 [*])	-3
Presetting	0
Reset PIN/ (0 without pin)	0
Kind of pulse counter	Volume flow rate
Volume flow rate unit	per hour
Automatic daylight saving time	yes

Parameter:

The following settings are available to set the parameters with ETS:

Show all measured data periodically The measured data is shown in preset cycles. If the data is not shown periodically it will be shown when there is a change; a minimum interval of 10 seconds is necessary to reduce bus overload.

Impulse Unit Value per Impulse The impulse value for the meter can be set.
Impulse Unit * 10^{*} Example: Displayed in m³ with 1 Impulse/l requires the setting 1 * 10⁻³, the input value =1 und the exponent = -3 .

Preset Impulse If the readings of the counter and the item value differ, the meter can be synchronized. The values are synchronized from the start and a 0 should be input.

If the meter is used without a S0 connector it can be resynchronized. Previously counted impulses are entered. 12.5 m³ with 1 Impulse/L so that a value of 12500 is only updated when the new meter reading is more than the old reading.

Reset PIN To ensure that only authorized users can reset the consumption value, a PIN can be entered. The reset value must match the PIN. If the PIN is zero, the reset value must not equal zero.

Type of Impulse Measurement „Volume Flow“ should be set.

Volume Flow Unit The volume flow can be determined: volume flow in m³/sec , m³/min , m³/h or m³/day.

3.0 Installation

The water meter must only be installed and put into operation by an authorized specialist. In addition, knowledge of Engineering Tool Software (ETS) is required. Start-up is carried out with ETS Version 2 or higher. You will find the water meter in ETS under manufacturer: Arcus-eds, product family: meter, product type: impulse meter/water meter.

The EIB programming button and programming LED are located on the attached housing. (see above).

Technical data for the water meter can be found in the data sheet of the manufacturer NZR:

Technical Documentation Water Meter Modularis WZ-M **db-wz-m.pdf (see attached)**

Wasserzähler Modularis WZ-M

water meter modularis WZ-M

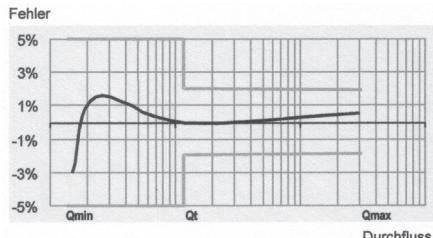

Modulsteckplatz / Modules slot:

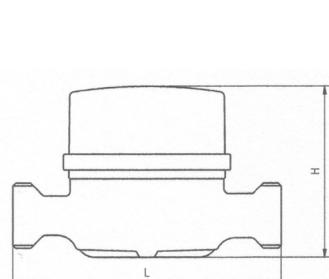

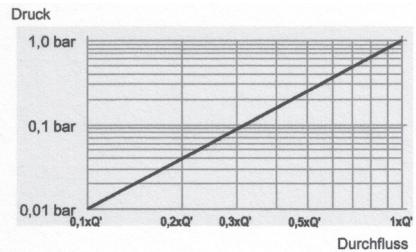

Der Wasserzähler ist durch seine vorhandene Aussparung im Messsatz jederzeit mit Fernauslese-Modulen nachrüstbar. Die Nachrüstung kann ohne Verletzung der Eichung erfolgen. Die Module werden durch eine Sicherungsplombe gesichert. Beim späteren Wechsel der Zähler können die Module weiter verwendet werden.

The water meter can be retrofitted with remote reading modules due to its opening in the measuring set. The retrofitting can be performed without loosing the validity of the calibration. The modules are secured by safety seals. The modules can still be used after meters have been replaced.

Fehlerkurve / Error curve

Druckverlustkurve / Pressure drop curve

Volumenteil / Volume device

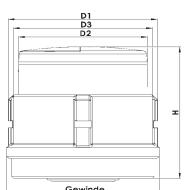

Typ / Typ	Aufputzzähler / surface-mounted			
Nenndurchfluss / Flow rate	q_p	m^3/h	1,5	2,5
Nennweite / Nominal diameter	DN	mm	15	20
Maximaler Durchfluss / Maximum flow rate	q_s	m^3/h	3	5
Trengrenze / Transitional flow rate	q_t	l/h	120	150
Kleinster Durchfluss / Minimum flow rate	q_{\min}	l/h	30	50
Anlauf / Starting flow rate		l/h	8	5
Anschluss / Connection AG Zähler / Meter	"		3/4	1
AG Verschraubung / Screw connect	"		1/2	3/4

Kapselzähler Modularis / Cap meter Modularis

Beschreibung / Description

- Alternativmesskapsel mit Modularis-Zählwerk / Alternative measuring cap with Modularis counter
- Mehrstrahl Trockenläufer / Multi stream dry rotator
- Kalt- und Warmwasserzähler / Cold and warm water meter
- Einbaulage horizontal, vertikal / Installation position horizontal, vertical
- Metrologische Klasse: B horizontal, A vertikal / metrological degree: B horizontal, A vertical
- Ein Montageschlüssel für alle Varianten / An installation key for all variants
- Gleitreibungsoptimierte Werkstoffe / sliding friction optimized materials
- Zählwerkgehäuse 360° drehbar / meter housing, rotatable by 360°
- 8-stelliges Rollenzählwerk mit 3 Nachkommastellen / 8-digit roller counter with 3 decimal places
- Mit integriertem Modulsteckplatz / With integrated module slot
- Nachrüstbar mit Modularis Modulen zur Fernauslesung / Retrofitable with Modularis modules for remote readout
- Passend zu am Markt befindlichen Rosetten / Fitting to escutcheons available on the market
- PTB und EG-Zulassung / PTB and EC-approval
- Die Originalrossetten können weiter verwendet oder durch eine neu Rosette (siehe Zubehör) ersetzt werden / the original escutcheons could just again or changed by new one (see accessory)

Kommunikationsmodule / Communication module:

▪ Impuls-Modul / Impulse module

- Impulswertigkeit / Impulse value 1 Imp./Liter
- Drehrichtungserkennung / Detection of rotation
- Anschlussleitung / connection cord 1m

▪ M-Bus-Modul / M-Bus module

- M-Bus gemäß EN 1434-3
- Drehrichtungserkennung / Detection of rotation
- Primär- und Sekundär-Adresse / Primary and secondary address
- mit 12 Stichtagswerten / with 12 cut-off date value
- mit zusätzlichem Impulsausgang / with additional impulse output 1 Imp./Liter
- mit Pufferbatterie (6 Jahre)/ with buffer battery
- Anschlussleitung / connection cord 1m

Type / Type	Beschreibung / Description	Art.-Nr.
MOD-I	Impuls-Modul (1 Imp./Liter)	8100
MOD-M	M-Bus- / Impuls Modul	8101
