eibPort – Informed everywhere

eibPort is the gateway for the EIB, Ethernet (LAN) and ISDN that provides security, overview and comfort for you. Next to the amount of functions and services *eibPort* includes a web-visualization that does not need any additional hard- or software and allows creating a representative visualizations within a few hours.

Security

With *eibPort* you are informed everywhere. At a breakage of glass you immediately get a sms message. At a breakdown of the heating you receive an e-mail at your working place. Are the lights switched off? Check it with the web-visualization of *eibPort* from everywhere – via pc, laptop, pda. By network cameras you can even view what is happening at your home. You are on the road? Then take your wap mobile phone and check the status or arm the alarm device.

Overview

A representative visualization does not need any longer additional hard- and software. With *eibPort* you easily and intuitively create ambitious visualizations for your EIB-Plant. View at once needless lighting and save energy by adjusting the temperature of the heating. The event camera immediately shows the pictures if someone approaches your home entrance.

Comfort

The automation and control functions of *eibPort* satisfy any wishes. Additional expensive logic modules or time switch clocks are not needed. Without great costs scenes can be generated that allow creating a comfortable atmosphere in your living room. Or hear your favorite MP3 sounds you can choose by EIB-Switchsensors. All functions like start, stop, skip forward, play louder etc. are available. Information like title, interpret... can be shown in the

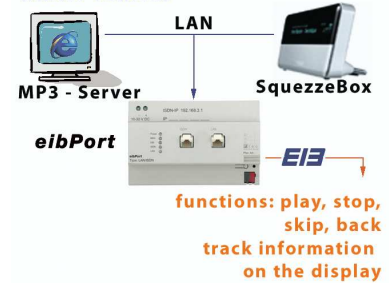

Saving Energy

eibPort collects all consumption and user data. You can transfer the data via LAN or ISDN and then you can analyse it with a software (e.g. MS- Excel). This can be the base of an energy optimised operation of your EIB-installation.

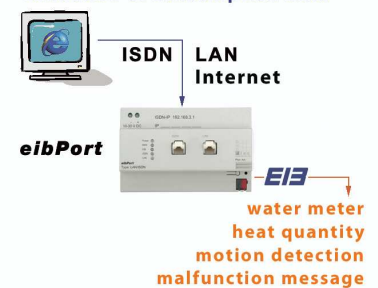

Service

You like to add new functions or want changes? Simply call your installer and he will fulfill your wishes from the distance immediately. You got experience in computers and EIB? Then simply parameterize *eibPort* yourself – fast and intuitive without handbook.
