IP VIDEO CUSTOM SOLUTIONS

Individual systems for multi-tenant residences, mail and parcel boxes with DoorBird technology

Designed, developed and made in Germany
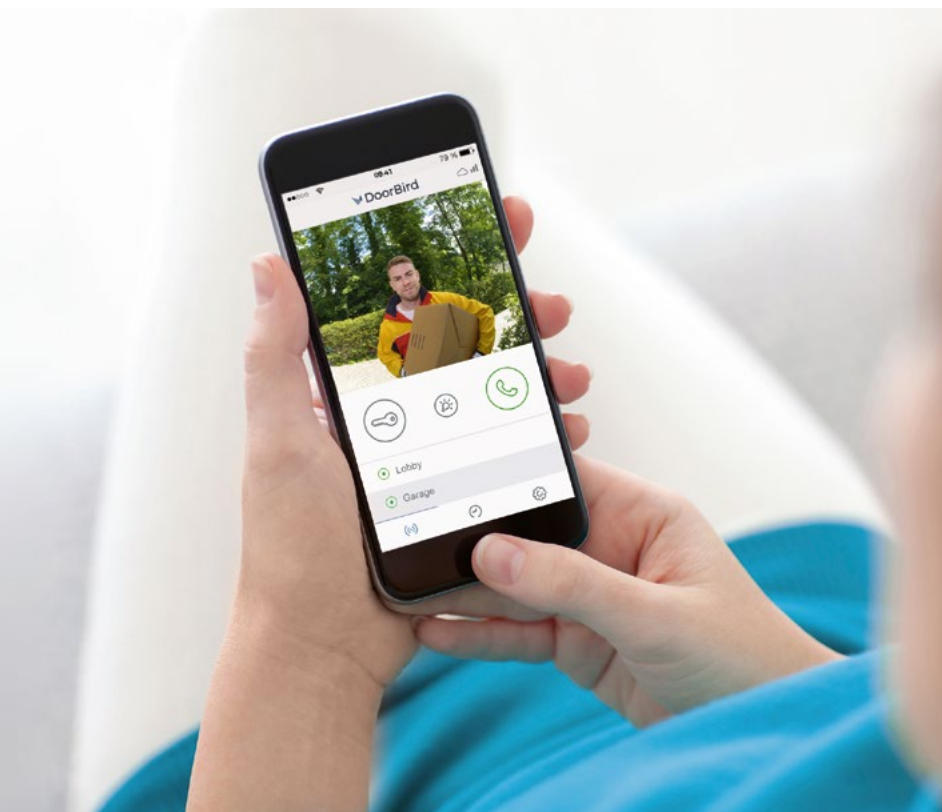

CUSTOMIZED DESIGN

DoorBird's custom solutions are developed and manufactured in Germany according to the highest quality standards. The thoroughly designed mailbox and bell systems from well-known manufacturers are equipped with DoorBird IP video technology. Whether through the wall or fence mounted mailboxes, freestanding communication columns or bell plates – the IP system is designed as requested and individually manufactured.

SMART HOME STARTS AT THE FRONT DOOR

DoorBird is the smart solution for your door entrance. The IP Video Door Station can be used as a stand-alone unit or can be integrated into an existing Smart-Home platform. Even existing classic installations such as a door chime or an electric door and gate opener can still be used with DoorBird.

HOW DOES IT WORK

Imagine, you are not at home and your children have locked themselves out or the courier delivers a package. With DoorBird this is no longer a problem. Each time someone rings the doorbell you get a push notification on your smartphone or tablet. You can then not only talk to the visitor but also see him in HD quality. You will never miss a visitor again. With DoorBird you are on the go and still at home, even if a burglar presses the doorbell to check if someone is at home.

ADVANTAGES

Video and audio call
- On smartphones, tablets (iOS, Android), IP and landline phones (SIP)

Open API
- Local interface for integration with third-party systems and SIP

Automatic door buzzer
- For use in medical offices and office environments

Smart Transmission Mode (STM)
- Real-time audio / video communication, optimized for mobile devices via WiFi, 3G, 4G, 5G

Smart Home & NVR compatible
· Control4, Loxone, Crestron, Synology, AVM FRITZ!Fon, URC, QNAP, RTI, ELAN, Fibaro, Bang & Olufsen and others

Individual action schedules, e.g.:
· RFID card „abc" has only access on Wednesday from 9 am until 11 am
· 4D motion sensor switches on external lamp between 9 pm and 6 am

RFID reader
· Configurable remotely via App (e. g. time frame)

Motion sensor with 4D technology
· Distance up to 10 m adjustable via App (interval: 1 m)

Easy connection to the network
· Connection via a network cable or a bell wire (with a 2-wire converter) to a RJ45 socket (PoE, network data)

Free visitor history
· Store still images for free, optional video recording available

Geofencing
· Automatic door and gate opening when returning home

Night vision
· With 12 Infrared LEDs

HDTV Video
· Ultraweitwinkel, hemisphärische Linse, 180°

Lichtsensor
· Für den Nachtsichtmodus

Noise reduction and echo cancellation (AEC, ANR)

Contact:
We supply individual bell and letterbox systems from leading manufacturers (e.g. Knobloch, Renz, s: stebler), equipped with our DoorBird technology.
