

Video distributor

Specification	Order No.	Packing unit	PS	EAN
	1226 00	1	10	4010337229919

Technical data

Power supply:	26 V DC \pm 2 V (bus voltage)
Connections:	2 screw terminals for 2-wire bus IN 6 screw terminals for 2-wire bus OUT
Temperature range:	-25 °C to +70 °C
Dimensions:	W x H x D 36 x 52 x 27 mm

Information

The video distributor is an active component for line adjustment of the video signal.

The video distributor distributes the video signal of the door stations, DCS-camera-gateways and DCS-IP-gateways to the home stations. It is required when the wiring routing to the video components of the Gira door communication system is carried out as a branch line. It ensures the proper terminating resistance to prevent possible reflections of the individual branches and the resulting picture disturbances. The video distributor is cascable. A total of up to 15 video distributors including video multiplexers can be used in one system. The combination housing makes three installation types possible:

- Surface-mounted (in a standard junction box)
- Flush-mounted (in a flush-mounted device box)
- As a DRA device (with the included DRA adapter)

No further configuration is necessary during start-up because the video distributor automatically adapts to the existing mains supply.
