Home Server

Manages all automation system of your home from one center...

What is Home Server?

With Interra Home Server all automation system is managed from one center. Ranging from keys and simple sensors, lightening and heating to complex systems such as alarm systems compiles everything in one central point and may ensure the control of all automation over android or IOS.

Through home server applications [Android, IOS, IPAD and IWatch], you can control all KNX or Interra EIO automation with one device.

Via Home server mobile application you can control lightening, curtains, blinds, security and camera systems from all over the world.

Home Server can communicate with all smart technologies at your home...

EIO (Ethernet Input/Output)

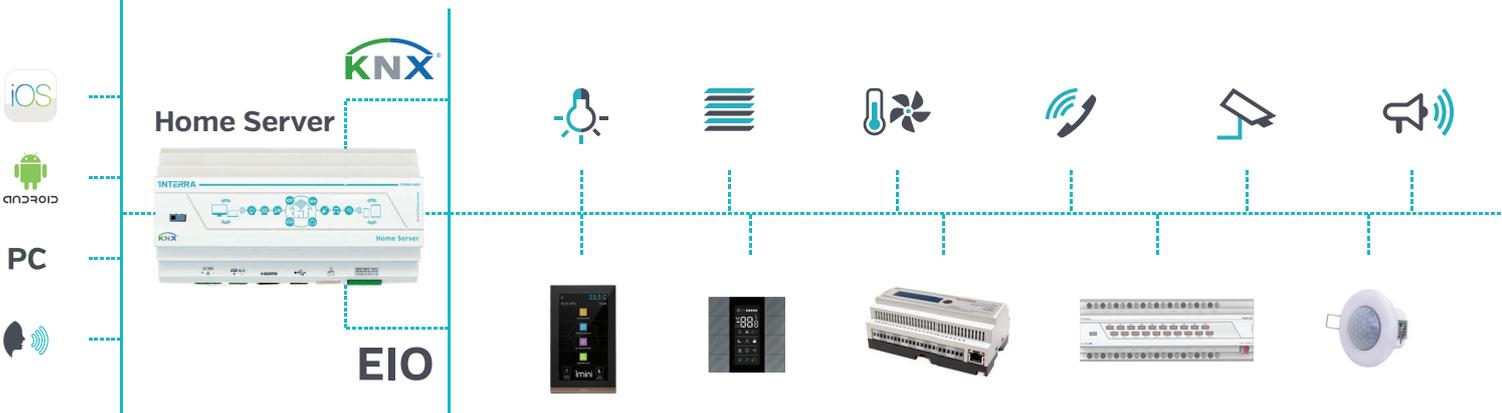

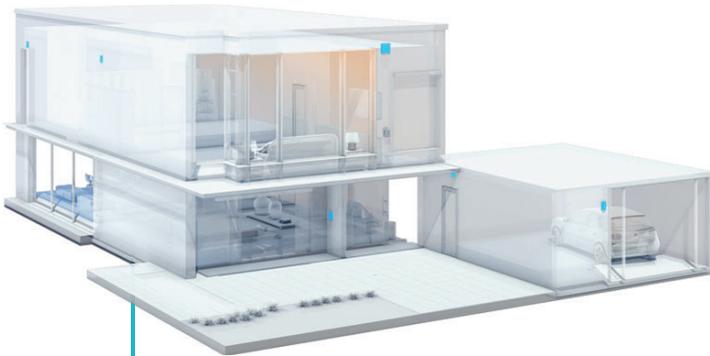

Using Home server you can control all automation system over EIO(Ethernet Input/Output)

Timer

Home Server'ın zamanlayıcı özelliği ile günlük, haftalık, aylık ve yıllık olarak istenilen işlemler yapılabilmektedir.

Alarm and Camera

One can control security systems over mobile and panel applications and at the same time monitor the cameras.

Logic Transactions

With Home Server logic transactions at choice can be made.

Push notification

In case of any notification via Google or Apple Icloud, a Push Notification is sent to the mobile applications instantly.

IOT (Internet of things)

All IOT compatible devices can be controlled via Home Server.

Voice Control

Using Home server, you can hold all the control of your home via voice command assistant applications such as Amazon Eco, Google Home and Siri.
