

IBOX-BAC-DALI DALI to BACnet Server gateway

Order Codes:

IBBACDAL064xxxx (64 ballasts, 1 DALI channel) IBBACDAL128xxxx (128 ballasts, 2 DALI channels)

HOW IT WORKS

The IntesisBox *IBOX-BAC-DALI* Gateway has been specially designed to work as a translator between a DALI installation and BACnet IP and/or BACnet MSTP based control and monitoring systems.

IntesisBox acts as a master in the DALI bus, allowing both BACnet IP and BACnet MSTP client/master devices to read and write on all configured DALI signals.

BACnet MSTP devices are connected to the serial port of the gateway, while BACnet IP devices are connected to the Ethernet port. On the DALI side, the gateway simulates a DALI master device allowing other DALI masters to be present in the DALI channels.

Configuration project is done through IntesisBox MAPS.

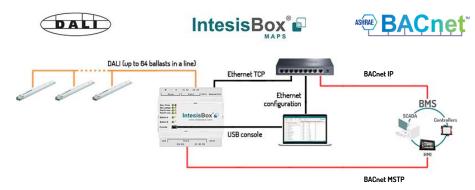

FEATURES

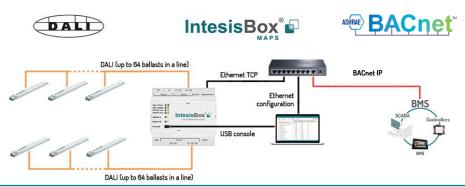

- Handles conversion between BACnet (IP & MSTP) and DALI hallasts
- Manages BACnet IP and BACnet MSTP simultaneously*
- DALI multi-master support
- · DALI line scan (ballast detection) and commissioning
- Configuration through IP or USB (Console) port
- · Datalogging through external USB port
- Front cover LED indicators to provide easy to check communication status on both the Ethernet and serial ports
- Includes IntesisBox MAPS with automatic updates for both IntesisBox MAPS and Gateway's firmware
 - * IBBACDALI128xxxx does not offer BACnet MSTP communication

CONNECTIONS

PROTOCOLS

DALI is a **dedicated protocol for digital lighting control** that enables the easy installation of robust, scalable and flexible lighting networks.

The digital nature of DALI allows **two-way communication** between devices, so that a device can report a failure, or answer a query about its status or other information.

Wiring is relatively simple; DALI power and data is carried by the same pair of wires, without the need for a separate bus cable

ASHRAE BACnet

BACnet is the Data Communication Protocol for Building Automation and Control Networks. Developed under the auspices of the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE).

BACnet is an American national standard, a European standard, a national standard in more than 30 countries and an ISO global standard. The protocol is supported and maintained by ASHRAE Standing Standard Project committee
