

NEW!

ISE SMART CONNECT KNX HUE

Philips Hue controlled via KNX

ise Individuelle Software-Entwicklung GmbH

The ise smart connect KNX Hue

Starting now, Philips Hue is controllable via KNX. Up to 25 lights, endless possibilities. Good bye extra app!

The summer mood caught at the ocean with your smart phone again lights up at home. Program your own sunrise. Or set the stage for your own house party – the individualization of light and thus the enhancement of quality of life come true with the wireless lighting system Hue by Phillips. The only drawback to KNX users: the lack of perfect integration into the KNX system.

The solution comes in the form of the new ise smart connect KNX Hue: with the KNX system, the innovative KNX adapter lets you control up to 25 Hue lights via dimmer or switch. From warm to lively, the lamps' LED technology opens up the wide spectrum of light hues. Individual RGB values can be set for each individual lamp. The KNX control element lets you choose comfortably between complete light scenarios and separate control.

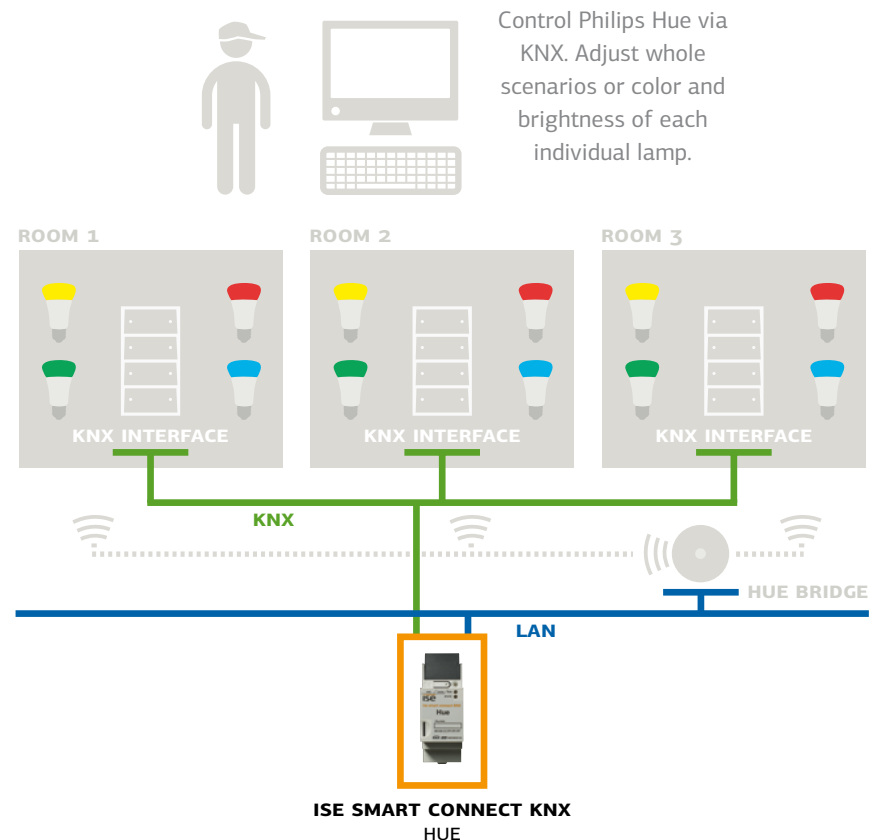

INTELLIGENT, INNOVATIVE TECHNOLOGY. NEVER BEFORE HAS A CONNECTION IN THE WORLD OF KNX BEEN THIS SMART!

Bright moment: Philips Hue meets KNX!

Finally control Philips Hue with all KNX controls. Individually design light by using color hues and brightness.

Features:

- Separately control up to 25 Philips Hue lamps via switching and dimming
- individual control of RGB color hues possible
- for ETS version 4.1.6. or higher

Smart Connection

Philips Hue controlled via KNX

Complete Philips Hue control via KNX – it is now possible thanks to the adapter novelty by ise! Please contact us and we will be happy to provide you with more details.
