DUNG

1 Installation and commissioning

1.1 Safety instructions and structure of the device

1.1.1 Safety instructions

Electrical devices may only be mounted and connected by electrically skilled persons.

Serious injuries, fire or property damage possible. Please read and follow manual fully. Danger of electric shock. Always disconnect before carrying out work on the devise or load. These instructions are an integral part of the product, and must remain with the end customer.

1.1.2 Structure of the device

Fig. 1: Structure of the device

- 1 Flush-mounted recessed box
- 2 Smart Control
- 3 Design cover left
- 4 Design cover right

1.2 Function

1.2.1 Intended purpose

- Operation and visualisation of system statuses and information on building automation
- for installation in walls

1.2.2 Product characteristics

- KNX visualisation in combination with Visu Pro Server (ref.-no.: JVP-SERVER-H..)
- KNX visualization in combination with Smart Visu Server (ref.-no.: SV-SERVER-INT)
- Pre-installed iHaus-Server-App; iHaus-KNX connection via IP router (ref.-no.: IPR 200 REG, IPR 300 SREG) or IP interface (ref.-no.: IPS 200 REG, IPS 300 SREG)
- Door call function only in combination with Siedle Smart Gateway SG 650-.. or SG 150-..
- Pre-installed weather page
- Display of up to six IP camera images
- Cleaning function
- Smart Gateway with integrated image storage
- Capacitive touchscreen
- Fanless, without rotating parts

1.3 Installation

1.3.1 Information for electrically skilled persons

DANGER

Electric shock from touching live parts in the installation environment. An electric shock can be fatal. Before working on the device, disconnect the power and cover live parts in the area.

1.3.2 Installation and electrical connection

Depending on the Smart Control dimensions it must be installed in various flush-mounted recessed boxes:

SC 10.1	SC 10 EBG
SC 15.1	SC 15 EBG
SC 19.1	SC 19 EBG

Ensure horizontal orientation when installing the flush-mounted box:

The flush-mounted box muste be exactly orientated in the wall.

- Connect LAN (PoE+).
- Connect optional power supply. Only SC 19.1: Always connect power supply, no Power over Ethernet possible.
- Place Smart Control in flush-mounted box. Slightly push down both holding clamps on the upper side of Smart Control to place it in flush-mounted box.
- Tighten all four locking screws (5) under left design cover and right design cover. (fig. 2)

Fig. 2: Locking screws under design covers

• Attach both design covers.

1.4 Commissioning

After connecting the device you must change the default settings for commissioning your device.

1.4.1 Settings – Menu overview

- General / Design settings
 - Select language
 - Set time / date
- Power / Lock screen settings
- System / Access settings
 - Password protection

1.4.2 Opening the settings menu

JL	JUNG LAUNCHER Settings											
	x	General / Design Settings										
	Ф	Power / Lock Screen Setting	s									
	۲	System / Access Settings								_ r		
	(i)									Ľ		
	Save ar	nd return										
	Ð	Back Get back to JUNG LAUNCHER										
↺			Ĵ	\triangleleft	0		D)					

Fig. 3: Settings

- Select JUNG-logo in main menu (JUNG Launcher). Password input opens.
- Enter password. The default password is "0000". Settings menu opens.

1.4.3 Changing the default language

⊘ @					↔ 2:	41
Language						
Bahasa Melayu						
Català						
Čeština						
Dansk						<
Deutsch (Deutschland)						
Deutsch (Liechtenstein)						
Deutsch (Österreich)						
Deutsch (Schweiz)						
Ċ	D	\bigtriangledown	0			

i The default language is English.

- Open settings menu.
- Select menu "General / Design settings".
- Select submenu "Select language".
- Select "Select language". Available languages are shown.
- Select language. Default language is changed.

1.4.4 Selecting the current date and time

•					↔ 5:05
Date & time					
Automatic date & time Use network-provided time					•
Automatic time zone Use network-provided time zone					
Set date September 20, 2018					
Set time 5:05 PM					
Select time zone GMT+02:00 Central European Summer	Time				
Use 24-hour format 1:00 PM					
Ċ	Û	\bigtriangledown	0		

Fig. 5: General / Design settings - Set date / time

- Open settings menu.
- Select menu "General / Design settings".
- Select submenu "Set date / time".
- Change settings:
 - autom. date & time: activated (date and time are applied by selected timezone)
 - autom. time zone: deactivated (device does not detect location, timezone must be selected manually)
 - Select time zone (e.g. GMT+2)
 - 24-hour format: activated

1.4.5 Changing the default password

Fig. 8: System Update – Update firmware via internet connection

Requirements:

- Internet connection
- App "System Update" in main menu
- Select app "System Update". App starts.
- Select "Check online for updates". Firmware is updating automatically.

2 Connections, operating controls and indicator lights

2.1 Operating controls device front side

Fig. 9: Operating controls device front side

	Name	Function
1	Speaker	for playing signal tones
2	SDHC card reader	for reading memory cards
3	Microphone	for door communication
4	Home button	to get back to main menu
5	Reset button	for restarting the device

2.2 Connections device rear side

Fig. 10: Connections device rear side

	Name	Function
6	USB OTG Mini	USB connection for maintenance work
7	DC 12 32 V	connection for optional external power supply
8	LAN (PoE+)	network connection and power supply
9	USB 2.0 (2 x)	connection for USB devices

3 Operation and configuration

3.1 Control elements

For operation and configuration of the device control elements are available.

The control elements are not shown in every menu or app.

Fig. 11: Control elements

	Name	Function
A	Status bar	display of time display of status messages from started apps
В	Side bar	list with app shortcuts from main menu (JUNG Launcher)
С	Navigation bar	contains basic control elements
1	Off/Restart	for restarting or switching off the device
2	Quieter	for increasing the volume
3	Back	leads back to the provious monu

3	3 E	Back	leads back to the previous menu
4	1 1	Main menu	leads directly to the main menu (JUNG Launcher)
5	5 /	App overview	opens an overview of all started apps
6	3 1	Louder	for decreasing the volume
7	7 (Context menu	opens the context menu of the shown app

3.1.1 Opening the status bar

• Swipe from the top side of the touchscreen to the middle of it. Status bar opens.

3.1.2 Opening the side bar

• Swipe from the right side of the touchscreen to the middle of it. Side bar opens.

DUNG

3.2 Device settings

Besides the settings for commissioning settings for the device can be made. The device settings are called up via the JUNG Launcher in the main menu.

See "Opening the settings menu" in the chapter commissioning.

3.2.1 Settings – Menu overview

- General / Design settings
 - Network configuration
 - Enable weather report
 - Select city
 - Select design
 - Enable side panel
 - Auto-close side panel
 - Show navigation bar
 - Show virtual power button
 - Empty button description
 - Set page amount
 - Long click function
- Power / Lock screen settings
 - Display brightness
 - Brightness sensor
 - Proximity sensor
 - Lock screen
- System / Access settings
 - App autostart

3.2.2 Menu area "General / Design settings"

- Select menu "System / Access settings".
- Select submenu "App autostart". App list is shown.
- Select app. App will be started automatically after every reboot of the device.

3.3 Operation via apps in the main menu

The device is operated by preinstalled apps. The apps must be started via main menu.

Fig. 27: Main menu (JUNG Launcher)

3.4 Apps for building automation

Software applications for building automation are already preinstalled on the device.

Depending on the used system, only specific apps can be used.

The apps are for the visualization of system statuses and for the controlling of single components.

Examples for preinstalled apps for building automation:

- JUNG Visu Pro
- JUNG Smart Visu Server
- JUNG Kamera
- JUNG Facility Pilot
- Door communication
- eNet Smart Home
- iHaus
- i Before using apps, app shortcuts must be created in the main menu. See "Creating app shortcut in main menu" in chapter commissioning.

These apps are just working with additional hardware and software. Components from third party suppliers could also be required.

For more information about apps see the product documentation of the specific device. The product documentation can be downloaded from our website.

3.5 App configuration

i Before using apps, app shortcuts must be created in the main menu. See "Creating app shortcut in main menu" in chapter commissioning.

C) C) <	1	0		J)			

Fig. 32: System Update - Restore default settings

- Select app "System Update" in the main menu. App starts.
- Select "Reset device to factory settings". Request about restoring the default settings opens.
- Confirm restoring with button "OK". Default settings are restored.

Updating the firmware without internet connection

Fig. 33: System Update – Update firmware without internet connection

i Check firmware version in "Settings" menu.

Requirements:

- SD card or USB data storage with FAT32 file system
- Data files for update on SD card or on USB data storage device
- SD card in card slot or USB data storage device in USB connection
- Select app "System Update" in the main menu. App starts.
- Select "Browse SD card" or "Browse USB disc #1 or #2" (A) Data files are shown.
- Select update file in zip format. Path to the update file is applied (B).
- Select "Update using the specified 'update.zip' file" (C). Firmware is updating.

3.6 Installation of extra apps from app store

The app store of Google can be activated on the device.

Numerous apps of different manufacturers can be purchased via the app store.

Only install apps which are not influencing the basic functionality of the device.

Also take care that the device stays secure by using the app store. JUNG cannot guarantee that external apps are working on the device. A non-functional app from a third party is no reason for any complaint.

Details on the first steps with the Google app store can be found on the following web page: http://support.google.com/googleplay/?hl=de

Details about using the Goggle app store:

- Internet connection:

The app store requires an active internet connection. If the device is used without internet access, the app store is either automatically hidden or shows a corresponding warning message.

- Time and date settings:

In order to be able to use the app store, you have to check that your device shows the correct time and date settings. If these settings are not correct, the app store cannot connect to its servers and will show no contents. The time/date settings can be configured through the settings page of the JUNG Launcher. (General / Design settings – Set time / date)

- Cache of the app store:

If no app download is possible, please empty the cache of the app store through the settings of the JUNG Launcher. (System / Access settings – Manage applications – All – Google app store)

- Apps not shown:

Please note that you will not be able to install all apps from the app store on your device. The app store is filtering apps according to certain criteria (for example display size, permissions, additional functions like position sensor, GPS, phone etc.). If the device doesn't support a required criterion, the app will not be shown in app store. So if you shouldn't be able to see an app on your device that is visualised on your smartphone normally, it could be one of that not fulfilled criteria required by the app to be launched correctly. In this case you can try to get in contact with the manufacturer of the app in order to understand the missing criteria and eventually find a solution for being able to run the app on your device.

i The app store can only be used with a valid Google account. If needed, this account can be created directly on your device using the wizard within the app store.

DUNG

4 Cleaning

 \fbox{i} The cleaning mode must be started with "Screencleaner" app.

Suitable detergents:

Water, degreaser, glass cleaner, alcohol and isopropyl

Not suitable detergents:

Abrasive wipes or aggressive detergents

- Start cleaning mode or switch off device to lock touchscreen.
- Apply detergent or water on a cleaning wipe. Don't apply it directly on device.
- Clean front side with wipe. Detergent is not allowed to get into the device while cleaning.
- Switch on device after cleaning it or wait until automatic end of cleaning mode after 30 seconds.
