Switch actuators flush mounted - 1gang 16A, 2gang 6A

Switch actuator, 1-gang
Art. No. 2131.16 UP
Switch actuator, 2-gang
Art. No. 2132.6 UP

Operating instructions

## 1 Safety instructions

Electrical equipment may only be installed and fitted by electrically skilled persons.
Failure to observe the instructions may cause damage to the device and result in fire and other hazards.
Danger of electric shock on the KNX installation. Do not connect any external voltage to the inputs. Doing so may damage the device(s), and the SELV potential on the KNX bus line will no longer be available.
Danger of electric shock. Before working on the device or before exchanging light bulbs, disconnect mains voltage and switch off circuit breakers.
These instructions are an integral part of the product, and must remain with the end customer.

## 2 Device components

Figure 1: Switch actuator 1gang

Figure 2: Switch actuator 2gang
(1) Control cable
(2) Programming button and LED
(3) Connection of mains and power cables
(4) Opening for fastening - only switch actuator 1gang

## Connection assignment, power cables

Switch actuator 1gang:
BN, brown: connection external conductor L, output L'
Switch actuator 2gang:
BK, black: connection external conductor L
PK, pink: connection output L'1
GY, grey: connection output L'2

Figure 3

## Connection assignment of control cable

RD, red: KNX+
BK, black: KNX-
GN, green: input 1
YE, yellow: input 2
WH, white: COM input 1
BN, brown: COM input 2

Switch actuators flush mounted - 1gang 16A, 2gang 6A

## 3 Function

## System information

This device is a product of the KNX system and complies with the KNX directives. Detailed technical knowledge obtained in KNX training courses is a prerequisite to proper understanding.
The function of this device depends upon the software. Detailed information on loadable software and attainable functionality as well as the software itself can be obtained from the manufacturer's product database. Planning, installation and commissioning of the device are carried out with the aid of KNX-certified software. The latest versions of product database and the technical descriptions are available on our website.

## Intended use

- $\quad$ Switching of electrical loads for AC 230 V mains voltage.
- Installation in appliance box to DIN 49073
- Connection with enclosed terminals

## Product characteristics

- Two binary inputs for potential-free contacts, usable as extension inputs for local operation
- Operation as NO or NC contacts
- Feedback function for each output
- An additional function for each output: logical, forced-position or time function
- Time functions: switch-on delay, switch-off delay, staircase lighting timer
- Supply via bus, no additional power supply necessary
i Switch actuator 2gang: When activated by a central telegram the relay outputs of the actuator switch with a slight time delay.

## 4 Information for electrically skilled persons

### 4.1 Fitting and electrical connection

## DANGER!

Electrical shock when live parts are touched.
Electrical shocks can be fatal.
Before working on the device, disconnect the power supply and cover up live parts in the working environment.

Connecting and mounting the device

## DANGER!

When connecting the bus/extensions and mains voltage wires in a shared appliance box, the KNX bus line may come into contact with the mains voltage. This endangers the safety of the entire KNX installation. People at remote devices may also receive an electric shock.
Do not place bus/extensions and mains voltage terminals in a shared connection compartment. Use an appliance box with a fixed partition wall (figure 4) or separate boxes.
(4)
(5)

Figure 4: Installation in appliance box
(4) Appliance box
(5) Partition
(6) Potential-free contacts, e.g. for window contact or installation pushbuttons

Figure 5: Spacing between mains cable and control cable
Minimum spacing between the mains voltage and bus/extension wires: 4 mm (figure 5).
Do not exceed permissible total load including transformer power dissipation.

- Connect the load. Use the supplied sprung screwless terminals. Flexible cable ends must be tin-plated.
- Connect the device to KNX.
- If necessary, connect potential-free contacts to the inputs (figure 3).
- Install the device in the appliance box.

Function of Inputs 1 and 2 in the as-delivered state

| Input contact | Switch actuator 1gang | Switch actuator 2gang |
| :--- | :--- | :--- |
| 1 close | Toggle | Switch-over output 1 |
| 1 open | - | - |
| 2 close | Toggle | Switch-over output 2 |
| 2 open | - | - |

Switch actuators flush mounted - 1gang 16A, 2gang 6A

### 4.2 Commissioning

## Load the address and the application software

- Switch on the bus voltage
- Press the programming button

The programming LED lights up.

- Assign physical address.

The programming LED goes out.

- Write the physical address on the device label.
- Load the application software into the device.

## 5 Appendix

### 5.1 Technical data

Switch actuator, 1-gang, Art. No. 2131.16 UP
Rated voltage
AC $250 \mathrm{~V} \sim$
Mains frequency
Ambient temperature
Storage/transport temperature
$-5 \ldots+45^{\circ} \mathrm{C}$
Switching outputs
Contact type
Switching current $16{ }^{\mu}$
Capacitive load
Switch-on current 20 ms

## Lamp loads

Incandescent lamps 2500 W
HV halogen lamps 2200 W
Inductive transformers 1000 VA
Tronic transformers 1000 W

Control cable and inputs
Control cable (preterminated)
Input type
Total length of extension unit cable
Poll voltage, extension inputs
Dimensions $\varnothing \times \mathrm{H}$
$\varnothing$ Centre hole
Connection of outputs
Connection mode
KNX
KNX medium TP 1
Commissioning mode
Rated voltage KNX
Connection type for bus
Power consumption KNX
Switch actuator, 2-gang, Art. No. 2132.6 UP
Rated voltage
AC 250 V~
Mains frequency
Ambient temperature
$50 / 60 \mathrm{~Hz}$
Storage/transport temperature $-25 \ldots+70^{\circ} \mathrm{C}$
Switching outputs
Contact type
$\mu$
Switching current
Capacitive load
6 A / $14 \mu \mathrm{~F}$
Switch-on current 20 ms max. 120 A
Lamp loads

Switch actuators flush mounted - 1gang 16A, 2gang 6A
Incandescent lamps
1200 W
HV halogen lamps 1200 W
Inductive transformers
500 VA
Tronic transformers 500 W
Control cable and inputs
Control cable (preterminated)
Input type
Total length of extension unit cable
Poll voltage, extension inputs
Dimensions $\varnothing \times \mathrm{H}$
YY6x0.6
Potential-free
max. 5 m approx. -19 V

Connection of outputs
Connection mode Screwless terminal (enclosed)
KNX
KNX medium
Commissioning mode
Rated voltage KNX
Connection type for bus
Power consumption KNX

DC 21 ... 32 V SELV
Connection terminal
typical 150 mW

### 5.2 Warranty

We reserve the right to make technical and formal changes to the product in the interest of technical progress.
We provide a warranty as provided for by law.
Please send the unit postage-free with a description of the defect to our central customer service office.
