

MDT Switch Actuator 4/8/12-fold, MDRC

Version		
AKI-0416.04	Switch Actuator 4-fold	4SU MDRC, 230VAC, 16/20A, C-Load 200uF
AKI-0816.04	Switch Actuator 8-fold	8SU MDRC, 230VAC, 16/20A, C-Load 200uF
AKI-1216.04	Switch Actuator 12-fold	12SU MDRC, 230VAC, 16/20A, C-Load 200uF

The MDT Switch Actuator receives KNX/EIB telegrams and switches up to 12 independent electrical loads. Each output is switched via a bistable relay and can also be switched on the actuator by the mechanical manual control. The status of the switching channel is directly visible.

The MDT Switch Actuator is suitable for extreme high inrush currents and used for heavy loads (C-Load).

The outputs are parameterized individually via ETS. The device provides extensive functions like logical operation, status response, block functions, central function, delay functions and staircase lighting function. Additionally the device provides several time and scene control. If the mains voltage fails, all outputs hold their current position. After bus voltage failure or recovery the relay position is selected in dependence on the parameterization.

The MDT Switch Actuator has separate power supply terminals for each channel. It is a modular installation device for fixed installation in dry rooms. It fits on DIN 35mm rails in power distribution boards or closed compact boxes.

For project design and commissioning of the MDT Switch Actuator it is recommended to use the ETS or later. Please download the application software at www.mdt.de/Downloads.html

AKI-1216.04

- Production in Germany, certified according to ISO 9001
- **Comprehensive function extension**
- **Mechanical manual operation for direct actuation of the relay contact, status visible**
- NO and NC contact operation
- Status response by manual operation
- Time functions (switch-on/switch-off delay)
- Extensive staircase light and impulse functions
- **Extended logical and scene functions for each channel**
- Extended status functions (inverted, cyclic, at block)
- **Threshold switch (Byte/2Byte/2Byte float)**
- **Hour meter for switching**
- **Priority/forced operation with automatic release time**
- 4mm² / 2x2,5mm² screw terminals. Separate supply phases
- Power supply via KNX bus
- Quick application download (long frame support for ETS5)
- Modular installation device for DIN 35mm rails
- Integrated bus coupling unit
- 3 years warranty
