

Experience music throughout your home -
quite easy and convenient

The Autrix distributes music in the building -
from different sources in up to 8 zones.

For your music pleasure, all you need is the Autrix.

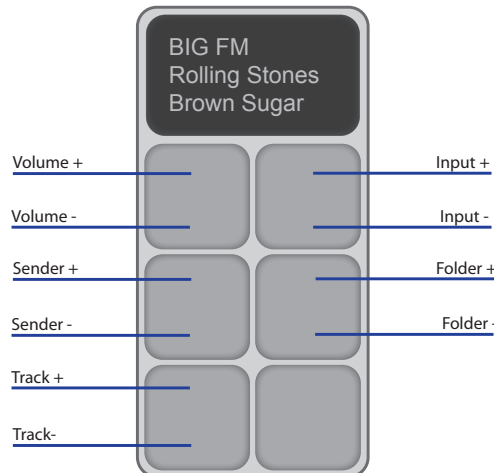

- For your music pleasure, all you need is the Autrix.
- Distributed in different zones
- Comfortable controlled directly by the KNX
- Integrated power amplifier (modular expandable)
- With an existing KNX building bus, the only thing required, is the speaker cabling
- Easy configuration via ETS
- For each zone the volume and the source are individually adjustable
- Radio / MP3 player optional available (**MusicClientOne**)

Adjusting the volume with the light switch.

Upon request, each light switch becomes a multimedia device:

- Always available
- Easy to use
- Controlling the volumen in the zones, selecting channels etc.
- By ID3 support all the available information to the track can be displayed.

Example:

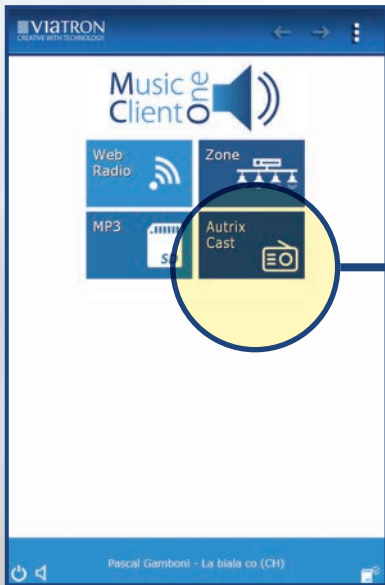

LAN

MusicClientOne: the web extension of the Autrix

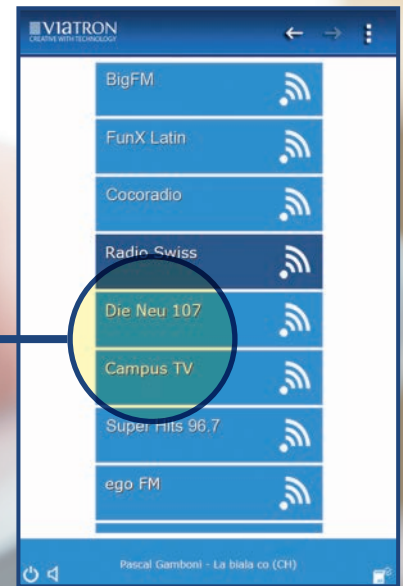

- Convenient Web Control (for smartphone, tablet, etc.)
- Integrated web radio and an MP3 player - fully operable via KNX
- Functions such as changing channels, select the song title, stop, forward / back etc. are included.
- The feedback from the media data such as artist, title, etc. is carried out directly in the KNX system.
- **AutrixCast** (preconfigured channel list - Plug & Play)

MusicClientOne - Operating the Autrix via browser

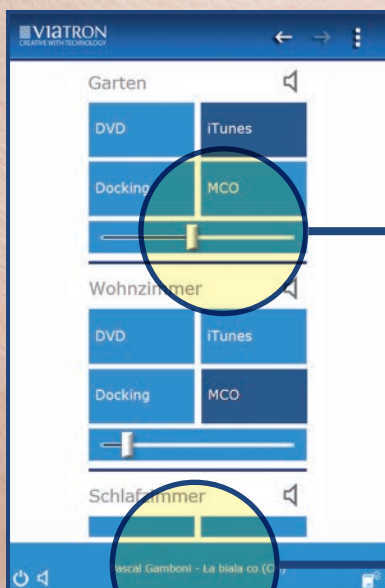

Simple operation with a clear structure

With the **AutrixCast** get music from all over the world into your home

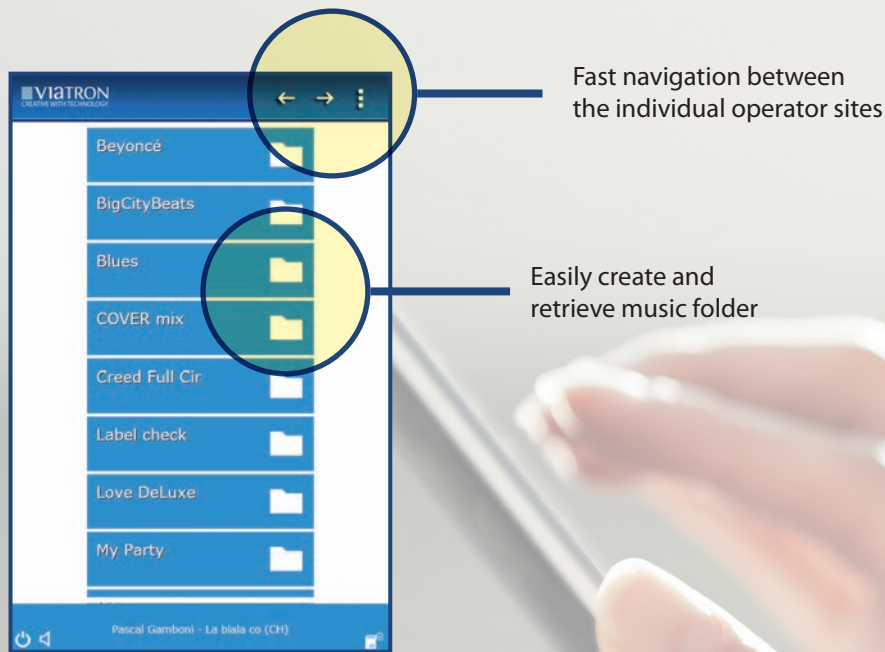

Your personal favorite stations - always available

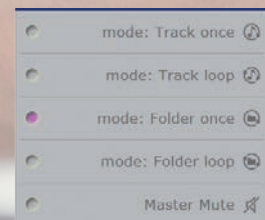

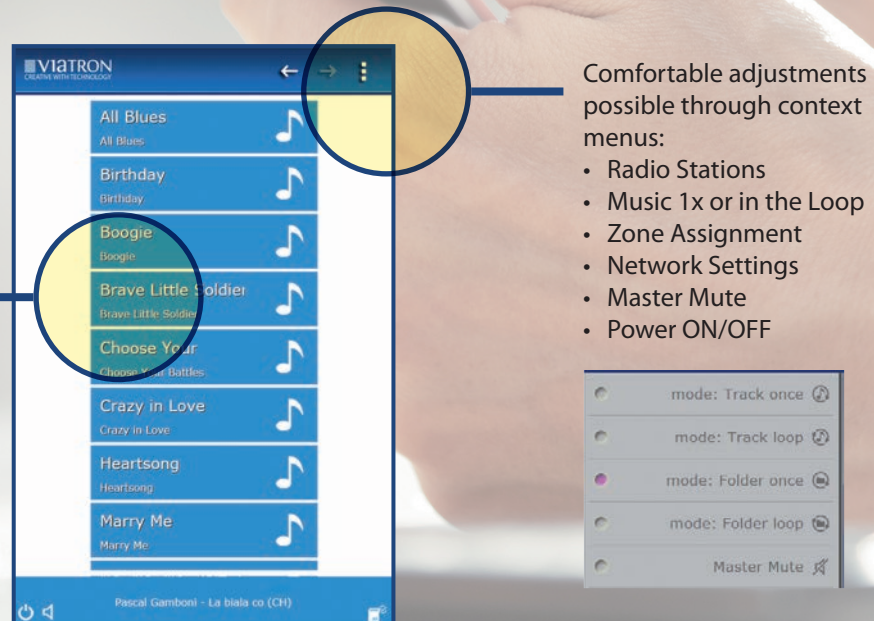

Adjusting the volume of the zones straightforwardly

Information about the song such as song title, artist, etc. via ID3 tags

Music control - just with your Smartphone, Tablet & Co

Listen to any song as often as you want, wherever you want – once or in the Loop

VIA [lat. THE WAY] TRON a scientific demanding device,
also included in the word ELECTRONICS

The VIATRON GmbH develops innovative products for the integration into your building bus and is reseller of components from the video and audio technology
