

Supported component types

The range of possibilities depends on whether you want to use Apple HomeKit, Amazon Alexa or Google Assistant. For HomeKit you can choose from several apps, like the Home app from Apple, to visualize your home. With HomeKit you can control your home with the voice assistant Siri on the iPad, iPhone, Apple watch, AppleTV and also with the HomePod. In case you have an Amazon Echo or Google Home, you can use voice commands for Alexa or the Google Assistant to control your home. Alexa and Google Home are available in only a few languages and support only a modest set of components. As soon as Amazon and Google extend their functionalities, Pairot will quickly add the support for these features through a free firmware update. Currently the following components are supported:

	APPLE HOMEKIT	AMAZON ALEXA	GOOGLE HOME
Dimming actuator	✔	✔	✔
Switch / switch actuator	✔	✔	✔
Thermostat	✔	✔	✔
Push button / switch	✔	✔	✔
Scene button	✔	✔	✔
Blinds actuator	✔	✔	✔
Temperature sensor	✔	✔	✔
Valve	✔	-	✔
Light intensity	✔	-	-
Humidity	✔	-	-
Occupancy sensor	✔	-	-
Motion sensor	✔	-	-
Contact sensor	✔	-	-
Smoke sensor	✔	-	-
Leak sensor	✔	-	-
CO sensor	✔	-	-
CO2 sensor	✔	-	-
Stateless button	✔	-	-
